15. Concluding Remarks:

With an aim to institutionalize the Federal Democratic Republic of Nepal according to the newly promulgated constitution, all three levels of elections in second phase for upcoming five years have been completed and the country has moved forward on the journey of prosperity with social justice with inclusive development. On such a historical occasion, if the provisions in the constitution are not strengthened with new plans, their implementation will be limited to the constitution itself. Therefore, the just rehabilitation of recently freed Harawa-Charawa has emerging issues so that all their levels of government in Nepal need to collectively work for the rehabilitation of HC. It is one of the historical initiative/event in Nepal led by HC in which the Freedom Fund had played significant role in terms of technical backstopping and mobilization of its local implementing partners in the ground.
